

Travel Plan Template

2026-08-29 · Travel schedule details

Introduction

Use **Schedule** for the current draft. Add each activity as a row with its time, place or task, priority, and status.

For travel planning, a dedicated **Travel Plan** type would be better. It could include:

- Destination and date range
- Travelers and contacts
- Transportation details
- Accommodation and reservation numbers
- Daily itinerary
- Addresses, maps, and links
- Budget and payments
- Packing checklist
- Emergency information
- Notes and backup plans

Sensitive information would remain browser-local and appear in exported backups or PDFs only when you explicitly generate them.¹
